„Making the right and informed decisions - combined with production technologies and continuous innovation have led to Prosperplast's rapid growth.

We think forward and ahead of time, so we can develop the best products on the market.

With the growth of technology and continual evolution of consumer demands, our online presence had a makeover, so we can serve our B2B clients and help our B2C customers in a better online environment. Developing our new website we had three core objectives: to interest, inspire and educate. We can proudly say we have achieved all three goals and will continue growing our online platform to support our current and new customers on daily basis.

Our product offering is growing, so is our virtual world! Sign up to the Newsletter on our website to stay up to date with news from our Prosperplast world."

425U S433 B411

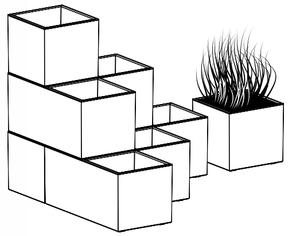
The Sierra Square Beton Effect is a modern, square flowerpot with a distinctive texture that mimics concrete. This collection was designed with the capability to create layouts and separate areas, such as on terraces or balconies, thanks to a stacking system for the flowerpots. It is an ideal solution for decorating outdoor spaces like balconies and gardens, as well as larger indoor settings including restaurants, shops, and offices.

Sierra Case Beton Effect is a modern, elongated rectangular flowerpot with an internal partition dividing the space into two sections. Designed for creating arrangements and separating areas on terraces or balconies, this flowerpot features a stacking system. Perfect for outdoor and indoor decoration, it comes with internal liners for easy plant repotting and water drainage. Special wheels at the base facilitate the transportation of plants or the entire arrangement.



Easy module interconnectivity.

Madera Square ECO Wood is a modern, square flowerpot in the shape of a cube, designed for creating compositions and delineating areas on terraces and balconies. Specially designed features facilitate the stacking of planters. It is ideal for decorating outdoor and indoor spaces such as restaurants, shops, or offices. It comes with an internal liner for easy plant repotting and water drainage, while special wheels aid in transporting tall plants or entire arrangements.

Madera Case Eco Wood is a modern rectangular flowerpot with an internal partition dividing the space into two parts. Designed for creating compositions and separating areas on terraces and balconies, it features a stacking system. Suitable for decorating outdoor spaces like balconies, gardens, as well as indoor settings such as restaurants, shops, or offices. Equipped with internal liners for easy plant repotting and water drainage. Wheels at the base facilitate plant transportation. The distinctive structure, inspired by natural wood, resembles a wooden crate, while the design can mimic a wooden partition.

Easy module interconnectivity.

wall-mounting system

Milly Round is an elegant round flowerpot with vertical, rounded grooves that give it a unique character. It features a classic cylindrical shape with a visible cut in the narrower part at the base, creating a ring-like effect. Its timeless design and muted colors allow it to blend seamlessly into modern arrangements, adding a designer touch to interiors, gardens, or terraces.

The hanging version of Milly features a discreet wall-mounting system that ensures stability while remaining nearly invisible. This gives the pot a suspended, lightweight appearance, maintaining its clean form and decorative appeal in both indoor and outdoor settings.

Openwork Sandy Round flowerpot that interestingly displays its structure. Equipped with an insert protecting against the soil pouring out. The collection in delicate neutral and pastel colours will adorn any space.

A flowerpot from the Sandy P collection with a surface enriched with gently undulating vertical grooves, resembling the look of desert sand. Equipped with a tray with a self-locking system.

The extremely decorative, hanging Sandy flowerpot will be a strong accent when creating a cosy interior. Inspired by hand-moulded, traditional ceramics.

bloma

Bloma is a set consisting of a long and spacious flowerpot in the form of a rounded box with a detachable pergola. The pergola is made up of five parts and connectors, creating a decorative support for climbing plants. Additionally, the set includes a brace for the planter, strengthening the structure. Bloma will work perfectly on the terrace, spacious balcony, or gazebo as a green separating wall. The planter is suitable for growing ornamental plants and vegetables such as peas, tomatoes, or cucumbers.

The Misa flowerpot resembles ceramic pots, a delicate ornament and a subtly textured surface adds to its elegance and grace.

The simple, timeless design makes it a perfect match for any garden or interior. The flowerpots are a perfect imitation of traditional clay products, but unlike them, they do not break easily. They create a perfect set.

A classic flowerpot shape with a delicately curled edge will work in any home décor, additionally decorated with a delicate ornament.

Terra plant pot from our trusted Terra Family line is an ideal choice for lovers of simple and classic designs. The product is universal and very durable.

wooden legs

A miniature, portable greenhouse or original box with legs made of hard, light-coloured wood. Equipped with a transparent lid with adjustable ventilation openings. A combination of functionality and timeless elegance.

plant herbs to enjoy tally fresh each day!

The portable seedbed collection from the Respana collection is an important part of the gardening backyard and a perfect solution for growers who face difficult climatic conditions. This miniature greenhouse which, does not take up much space at home, creates the perfect conditions for the growth of the seedlings through good ventilation and humidity control. Cultivation of early vegetables, herbs or warm weather-loving plants sensitive to weather conditions - can be continued regardless of weather condition outside and bringing a great joy of early harvest. The light transparent lid provides adjustable ventilation holes in order to create an ideal micro-climate and prevent from overheating plants. What is more it protects the seedlings from annoying insects.

stackable

Bloomo is a portable, freestanding seedling nursery that provides ideal conditions for seedling growth. It features a detachable, transparent cover with adjustable ventilation openings and special safeguards to prevent accidental disassembly. There are openings in the cover to facilitate its transport. The nursery can be folded as it has removable legs.

Grow your gorgeous garden with absolute ease!

Botanic is a portable, freestanding seedling nursery that provides optimal growth conditions for seedlings. It features a transparent cover with adjustable ventilation openings and special locking mechanisms to prevent accidental disassembly. The cover is equipped with handles for easy lifting. This compact and lightweight greenhouse creates perfect microclimatic conditions, preventing plant scorching and shielding them from insects. An additional advantage is the ability to stack one product in another (stacking). Keep in mind that the greenhouse is not completely airtight, so it is not recommended to place it on a floor that may be exposed to moisture.

HOME GROWER

Home Grower is a specialized planter designed for home cultivation of climbing vegetables, fruits, and ornamental plants requiring support. With the option to disassemble the supporting structure, enabling vertical growth and optimal utilization of cultivation space. It is a unique blend of functionality with thoughtful design; the planter not only fulfills its purpose but also presents itself beautifully. Home Grower is available in two sizes and three color variations, including the ECO Wood version. The product is made from material resistant to weather conditions and solar radiation.

Compatible with Tomato Grower Cap IPOC400.

SUPPORTS floo

Floo Supports: Sets of various elements such as stakes, spirals, rings, crossbars, and clips that serve as support for plants in their growth. They stand out for their versatility in application, suitable for different types of plants and various locations like gardens, balconies, or patios. Functional sets offer diverse configuration options, allowing for flexible adaptation to plant needs or overall floral composition. Plant supports are easy to assemble and disassemble, allowing for independent assembly and modifications to the structure at any time.
Thanks to their wide and deep anchors, they can be easily driven into the ground, providing stability for the climbing plant structure.

Elevate your plants to a higher level!

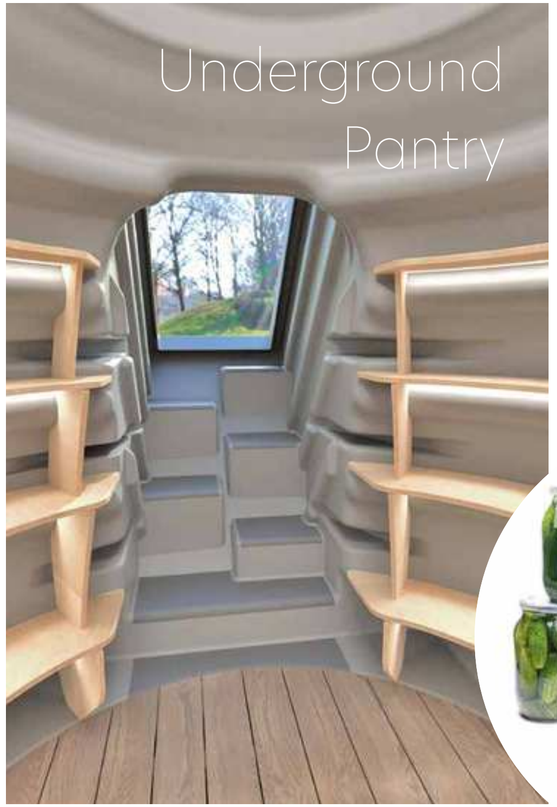
GARDEN CELLAR

A garden cellar as an additional space for storing food, maintaining a stable, relatively low temperature.
The temperature conditions in the underground cellar make it possible to store preserves, fresh vegetables, as well as wines.

Thanks to this, the cellar provides us with measurable economic benefits, such as a significant reduction in electricity bills.
It is a great alternative for additional storage space for homeowners without a basement or pantry.
The assembly of the cellar is extremely simple and it takes about 5 hours to set it up.
You need approx. 5m² of undeveloped space in your garden to install this modern dugout.

The material used in the production ensures high durability and resistance to moisture.
Thanks to high tightness, it also prevents unwanted guests such as rodents from getting inside.

Gravity ventilation allows free air exchange and does not require any mechanisms to operate.
Air exchange occurs under the influence of temperature differences.



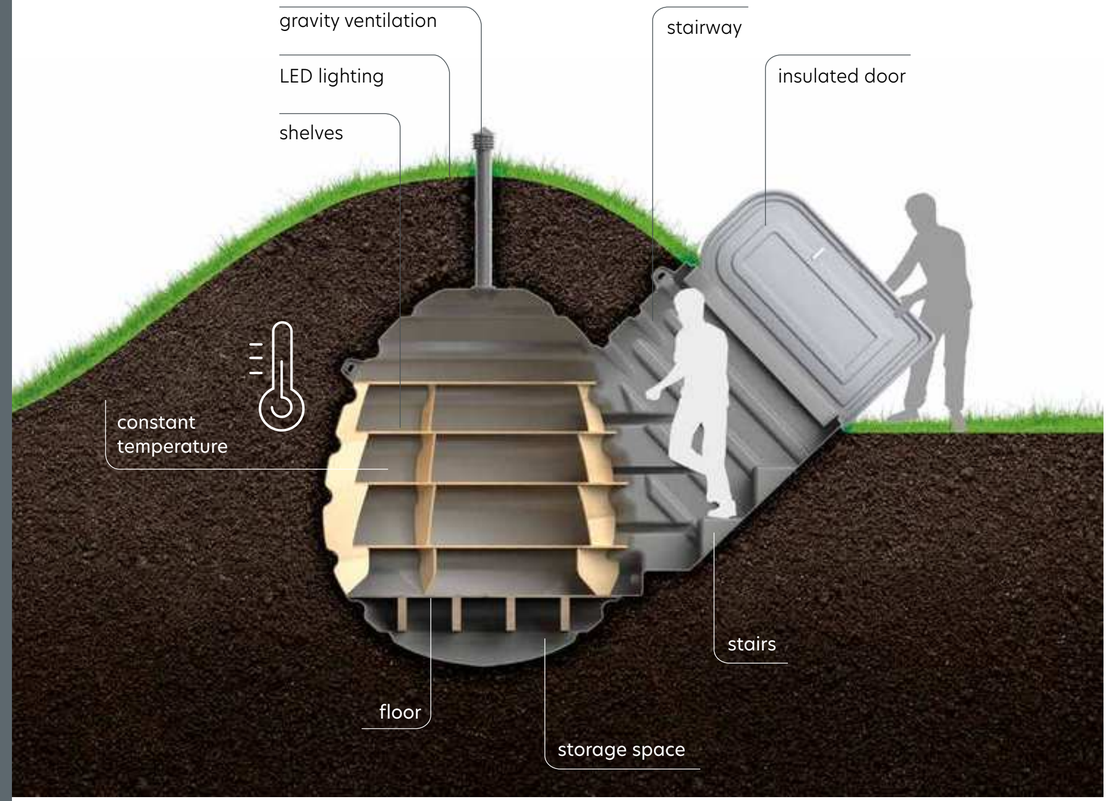
Ovo

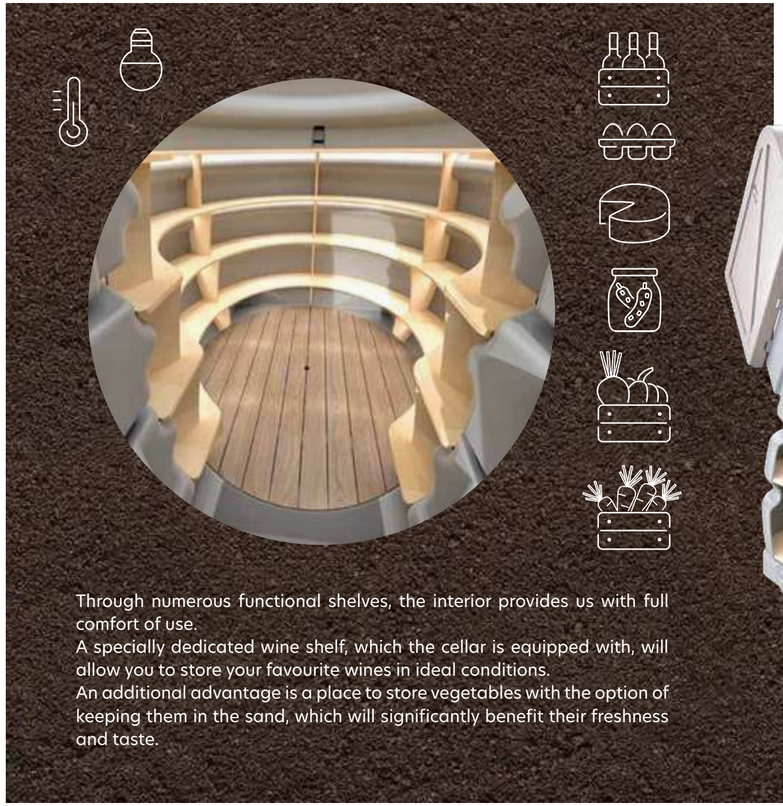
	mm	mm	mm	l
ROV	3570	2200	2600	7500,0

The cellar is environmentally friendly - it works without energy consumption.

100% recyclable

JOIN THE NATURE
regular collection





Through numerous functional shelves, the interior provides us with full comfort of use.
A specially dedicated wine shelf, which the cellar is equipped with, will allow you to store your favourite wines in ideal conditions.
An additional advantage is a place to store vegetables with the option of keeping them in the sand, which will significantly benefit their freshness and taste.

Base Plant

Base Plant is a range of lightweight and functional mini garden beds designed for simple and visually appealing plant cultivation in a variety of outdoor spaces. Made from durable composite material resistant to mechanical damage, UV rays, and changing weather conditions, these beds offer long-lasting performance in open-air environments.

Base Plant mini beds are easy to assemble, requiring no tools, and their modular design allows for flexible configuration to suit different layouts and user preferences. Individual modules can be joined together to form larger, well-organised planting areas that enhance both function and appearance.

The range includes four variants: rectangular and square mini beds available as single units or in double sets, enabling users to arrange planting spaces freely in gardens, on terraces, or in urban green zones.

Compobox is a compact and easy-to-assemble compost bin composed of modules that can be put together quickly without the need for tools. The top module features a large opening for depositing organic waste, closed with a cover secured by a special padlock included in the set. This feature ensures that the compost bin is protected from accidental opening by wind or animals. The bottom module contains two slides for convenient removal of compost. All modules feature numerous holes providing proper airflow and enabling moisture for effective decomposition of organic matter. The lower part of the compost bin is stabilized on the ground with 4 pegs. The pegs and padlock are attached to the underside of the cover during sale.

405U base / S433 base

IBFS-405U IBFS-S433

The improved design means that, when you do need to fill them, it's really easy. It has a large food storage for birdseed that can be poured through a hole in the roof. The original, streamlined shape will be an ideal decoration of any garden or balcony. It can be hung on a tree or attached using a tie cord strap to a balustrade or branch. The design also allows it to be placed on pile in the straight forward position anywhere in the garden.
